Code of Conduct S. Goldmann GmbH & Co. KG

We, S. Goldmann GmbH & Co. KG, are the leading suppliers of specialty chemicals and raw materials with our global network. Our diverse product portfolio includes chemical specialties and fine chemicals for a variety of demanding industrial applications as well as innovative ingredients for the manufacture of cosmetics, pharmaceutical products and dietary supplements.

Openness, fairness, partnership, tolerance, reliability and loyalty as well as a positive attitude towards our society are fundamental values for us that are part of our daily work. We stand by our social responsibility towards our international and national partners as well as our employees. Compliance with occupational health and safety and environmental protection forms the basis of our everyday work.

In addition, we are committed to the ecological values and goals of protecting the environment and resources. We follow the principles of the Responsible Care program, and we expect this fundamental attitude from our partners as well. The achievement of our RC goals on the topics of product stewardship, plant safety, occupational health and safety, environmental protection, transport safety, dialogue and information for the public, to which we admit as RC-member of the Chemical Trade Association since 1997, is checked every 3 years by an independent third party and proved by a certificate, whereby we have to provide evidence of continuous improvement beyond the legal requirements. So, we looked into the corporate social responsibility (CSR) idea at an early stage.
